

Series Q

Effective, simple and flexible

STAT350

Data acquisition software

Series Q

Designed and built for bulk products

The **food traceability and re-traceability laws** have added a further degree of complexity to the industry. The management software created by NEMESIS is an excellent solution to these problems.

STAT350 acquires indications about the origins of the products, as well as the events and variations that may have occurred during the individual production phases, **thereby complying with the HACCP recommendations.**

Effective, simple and flexible

The HSC350 "Q Series" checkweigher features an innovative design and construction, and it is **extremely simple to use and service:** the modular plastic belts are easily removed which makes washing and sanitising quick and simple.
