Serie S

Semplice, veloce ed accurata

www.nemesis.it

Simple, fast, accurate

The "S Series" HSC350 checkweighers can be integrated with:
- Datamatrix one-dimensional or two- dimensional marking systems
- Display system for monitoring the package and marking
- Multiple ejector systems with strict separation of the different products rejected.

The "S Series" includes modular checkweighers that meet the current requirements of the **pharmaceutical industry,** especially the GMP regulations and the stringent quality control reference standards.

Marking and inspection system	Bottle check	Progressive rejector	10" Touchscreen interface	Box check	Round products transport

The HSC350 range of measuring instruments has been designed using sturdy, tried-and-tested measuring technology to meet the industry's growing demands, with special attention to the specific requirements of each manufacturing sector.

The creation of customised solutions designed to suit the size and shape of the products to be conveyed and measured ensures excellent results and full integration into even the most complex production lines.

Various different configurations are available with 1 to 5 conveyor belts and width measurements ranging from 45 mm to 160 mm, for conveying bottles, tubes, blister packs and boxes.

HSC350	/000	/00	/0
Scale range	150 g	300 g	600 g
Resolution (d)	≥ 10 mg	≥ 20 mg	≥ 20 mg
Division (e)	≥ 50 mg	≥ 0,1 g	≥ 0,2 g
